## JS Question 2 (check console)

Unique elements: 1, 3, 4, 5

## JS Question 3 (check console)

Longest word: JavaScript

## JS Question 4 (check console)

Chained result: 6

## JS Question 5 (check console)

Question 5 Output: See console for hoisting behavior.

## CSS Question 1

**Pixels (px):** This box has a width of 200px and font-size of 16px. It's an absolute unit and doesn't respond to screen size changes.

**Ems (em):** This text is 1.5 times the font-size of its parent. `em` scales based on inherited font size.

**Rems (rem):** This font is 2 times the root `` font size. `rem` ensures consistency across elements.

**Percent (%):** 50% of the parent container's width (400px), so it is 200px wide.
